Testimonial of TCS on the ROK Nth Fire Main Construction Project

To whom it may concern

TriCore Civil Services Pty Ltd (TCS) successfully delivered the **Central Queensland University Fire Hydrant Upgrade Project** as Principal Contractor under the management of **Mr. Mitch Hannan**. The project involved a diverse and technically complex scope, including:

Scope of Work

- Replacement and installation of new hydrant mains, valves, boosters, fire apparatuses, and associated components in compliance with all relevant standards and authority requirements.
- Civil and plumbing infrastructure works across multiple campus zones, including trenching, service relocations, reinstatements, and hardstand construction.
- Earthworks and roadworks to support new hydrant layouts and restore operational access.
- Comprehensive testing, commissioning, and certification in coordination with the University, local authorities, and relevant stakeholders.

Project Delivery

Throughout the project, Mitch and the TriCore team demonstrated:

- Strong project management and technical competence.
- Professionalism and commitment to safety and quality.
- Effective communication and proactive problem-solving.
- Ability to manage live campus environments with minimal disruption.

As the lead fire system designer, Mitch and the TriCore team worked collaboratively with the GHD design team, addressing design issues and site constraints promptly and effectively to achieve practical solutions.

Recommendation

Based on our experience, we confidently recommend TriCore Civil Services for future civil, plumbing, or fire infrastructure projects requiring a capable and reliable Principal Contractor.

Sincerely
GHD

Bryan Percival

Senior hydraulic and fire consultant
